***NOTICE**

Although we can not predict or guarantee who may react, most clients do not experience reactions beyond redness and minor irritation. Hair may break at the root during waxing, if hair is thin or weak, causing some hairs to grow out faster. Please follow these guidelines to minimize irritation and possible break outs.

-A CLIENT CANNOT GET WAXED WHILE TAKING ANY ANTIBIOTICS

-Avoid the sun immediately after waxing and wear sun screen; recently waxed areas are prone to hyper pigmentation (permanent darkening of the skin) if exposed to the sun or solarium.

-Avoid saunas, steam rooms, whirlpools and other heated sources for at least 48 hours.

-Avoid heavy exercise for at least 24 hours after waxing.

-Do not use exfoliating products (AHA, scrubs, etc) andofahs for at least 24 hours after waxing as they might further irritate your skin.

-Avoid tight clothing after waxing, especially in the waxed areas. Tight clothing may result in irritation and ingrown hairs.

-No hot baths, hot showers
While your pores are open, they are vulnerable to irritation by the extreme temperatures and infection by bacteria.

-Moisturize with a tea tree or lavender lotion after every shower, this has a soothing healing, antibacterial effect. If using an ingrown solution, use this alone until the ingrown and redness is minimized, then return to the lotion for maintaining your bikini area.

-Routine waxing helps the skin get accustomed to the procedure and may minimize irritation.

DISCLAIMER: Profiles Nail Salon has made every effort to ensure this information is accurate. WE ACCEPT NO RESPONSIBILITY FOR ANY CONDITIONS THAT MAY OCCUR AFTER A CLIENT HAS LEFT OUR SALON. Please follow the above guidelines to ensure that after being waxed, that the open pores are not infected or irritated.
